THESIS & PROJECTS

Postgraduate Thesis: Preparation and in-vitro evaluation of ocular microemulsion formulation containing cyclosporin A.	2000 - 2003
---	-------------

Anadolu University / Eskişehir / Turkey

Abstract: Preparing and developing a new microemulsion formulation suitable for ocular use by preparing an effective and stable o / w type microemulsion formulation of cyclosporin A, a practically water-insoluble active substance. For this purpose, biologically acceptable microemulsion components suitable for ocular use were selected. Then, in the literature, o / w type microemulsion formulation was prepared. This obtained

microemulsion formulation is a transparent and stable formulation. The stability was monitored from the droplet size distribution of the microemulsion system and no change was observed in the droplet size distribution of microemulsion systems stored in different environments for more than six months.
